Career Objective

Computer Science student experienced in Python, Flask, and cloud technologies, seeking to leverage strong OOP and API development skills. Proven ability to build AI-powered applications and scalable web solutions. Eager to learn C#, .NET, and React while contributing to team projects.

Education

CMR Institute of Technology

B.E (Computer Science and Engineering) [Pursuing]

2022 – 2026

Bengaluru, Karnataka

Ambika PU College

Pre-University (Science)

2022

Puttur, Karnataka

Shri Sharada English Medium High School

SSLC

2020

Muddebihal, Karnataka

Technical Skills

Programming Languages: Python, C, Bash

Frameworks & Libraries: Flask, Django, Pandas, NumPy

Databases: MySQL, SQL, MongoDB

DevOps & CI/CD: Docker, GitHub Actions, Ansible

Architecture & APIs: RESTful APIs, API Design,

Tools: VS Code, Power BI, MS Office (Word, Excel, PPT)

Methodologies: Agile, Scrum, OOP, Design Patterns

Web Technologies: HTML, CSS

AI & GenAI: LLMs, RAG Pipelines, Transformers

Cloud Platforms: AWS (S3, Lambda, DynamoDB, EC2)

Version Control: Git, GitHub

Data Handling: Data Cleaning, EDA, Data Visualization

Operating Systems: Windows, Linux

Soft Skills: Problem-Solving, Teamwork, Communication, Leadership, Adaptability, Planning

Projects

FinBot: News Research Tool | *Python, LangChain, FAISS, OpenAI, Streamlit*

Oct 2024 – Mar 2025

- Built an LLM-powered financial news research system using RAG architecture with FAISS vector indexing and OpenAI embeddings for sub-second semantic retrieval.
- Designed an interactive Streamlit dashboard enabling users to input URLs, ask natural language questions, and receive source-cited answers in real time.

Custom-Fit Clothing E-Commerce Platform | *Python, Flask, JavaScript, MySQL*

Jul 2024 – Dec 2024

- Developed a full-stack e-commerce application using Flask backend with responsive JavaScript frontend, featuring user authentication, cart management, and admin panel.
- Implemented RESTful API endpoints with automated data validation workflows, reducing order-related errors by 25%.

AI Chatbot Web Application | *Python, Flask, OpenAI APIs, JavaScript*

Sep 2023 – Dec 2023

- Designed a full-stack web application integrating OpenAI GPT model with Flask backend for seamless conversational user experience.
- Implemented RESTful APIs for frontend-backend communication with database-integrated conversation logging for persistent storage and analytics.

Co-Curricular & Extra-Curricular Activities

Certifications

- AWS Educate: Introduction to Generative AI**, AWS, Jul 2025
- Personal Growth & Leadership**, McKinsey Forward, Jul 2025
- Prompt Engineering**, Columbia University, May 2025
- Introduction to Data Science**, Springboard, Sep 2024
- Database and SQL Fundamentals**, Infosys Springboard, May 2023

Industrial Visits

- Visited **Bangalore Tech Summit 2024** to explore advancements in AI, Cloud Computing, and Data Engineering.

Sports

- Active **Cricket** and **Volleyball** player demonstrating teamwork and leadership skills.
